

# Attention-Deficit/Hyperactivity Disorder (ADHD) Monitoring and Follow-up

Maintenance follow-up visits should occur at least every 3 to 6 months

## Review of Systems

- Special attention given to blood pressure, heart rate, height, and weight
- Comparison with patient's baseline
- Comorbid concerns

## Medication Management

- Adverse effects
- Efficacy/symptom control (use of ADHD rating scales)
- Dosage adjustments (titration vs. dose reduction)
- Adherence (timing of refill request)
- Risk Reduction Strategies (prescription stimulants in patients who require additional monitoring)
  - Prescription Drug Monitoring Program
  - Urine drug testing
  - Ongoing risk screening

## Nonpharmacological Management

- Appropriate referrals and coordination of care
- Adherence to nonpharmacological treatments
- School or workplace accommodations

## Overall Review of Treatment Plan

- Symptom management assessment (ADHD assessment scales)
- Referrals to additional specialists where indicated
- Parental/caregiver/family member concerns addressed
- Scheduling of follow-up visits
